

Challenge – File Copier

You are required to create file copy program which works exactly like windows file copy mechanism with functionalities described as below.

- It will ask user for file name which needs to be copied.
- If input file exist then it will copy that file into new file name with exact conventions followed by windows. (i.e. "- Copy", "- Copy (2)" etc.)

- You can create it in any language/framework.

Bonus Challenge

Crack web page located at https://promactinfotech1-my.sharepoint.com/:u:/g/personal/rushi_promactinfo_com/Ea70dE-Ye1RBjrHwjDjFkRYBknqDjTuIDkk7KWCTtgTQeQ?e=7wA0YS (You need to download html file first and then proceed further)

Submission: After completion, you can submit your approach and source code via email to me at rushi@promactinfo.com
